2. GL Official Service Provider Procedure Manual

Part II Standard Booth

1. Standard Booth Description and Precautions

1) Design and Setting of 9 m² Standard Booth (As following)

2) Following Equipment and Size will be included in Each Standard Booth

Equipment and Size of Standard Booth										
Fascia Board、Carpet		Fascia Board with White on Blue; and blue carpet								
Panel		The booth is composed of aluminum brackets and three white panels. The corner booth has two panels and two fascia boards								
Furniture		Information Table *1 (1000x500x750Hmm)、Folding Chair*2、Dustbin*1								
Electrical appliances		A 500W single-phase socket (for small electrical appliances only, not to connect to lightings and machines)								
		Four 28W long arm spotlights (2 in the booth, 2 on the lintels)								
Reference:										
1.	Please see the following equipment of different sizes of booth. All standard booth equipment (including furniture and electrical appliances) cannot be replaced.									
Item		≤9 m²	12 m²	15 m²	18 m²	21 m²	24 m²	27 m²	30 m²	36 m²
Information Table		1	1	2	2	2	3	3	3	4
White Folding Chair		2	2	3	4	4	5	6	6	8
Dustbin		1	1	1	2	2	2	3	3	4
500W Single-phase Socket		1	1	1	2	2	2	3	3	4
28W Long arm spotlights		2	2	3	4	4	5	6	6	8
2.	If an exhibitor orders two or more consecutive booths, unless the exhibitor specifically requests, the organizer will remove the panel between the booths.									
3.	Other equipment, such as special decorations, additional lighting, furniture, etc., are subject to additional charges. (Hall 1,3,5,6,7,8) Log in GL official service platform: http://zhan.zzxes.com.cn/special/2024dmp (Hall 9,10,12) Log in Hanwei HSC official service platform: http://47.112.235.56/zcy (Hall 2,4) Log in Image official service platform: www.image-oss.com									

3) Management Regulations of Standard Booth

The standard booth configuration is unified, and all exhibitors are not allowed to disassemble or modify by themselves. Otherwise, the organization has the right to force the original state to be restored, and all the costs and consequences will be responded by the exhibitor.

4) Standard Booth Precautions

Exhibitors of standard booths need to further implement the following terms proposed by the official contractor before booth setting:

- 1、 All booths are built by high quality aluminum wares, so it is prohibited for exhibitors to use drills, nails, or screws, metal spikes, pins etc. to set the booth;
 - 2、 Booth height limit: The height of the standard booth panel is 2.5 meters, and all items installed by the exhibitor shall not exceed this height. During the exhibition, any items of exhibitors shall not exceed their booth area, otherwise the organizing committee has the right to request exhibitors to restore the booth to its original state, and the expenses incurred shall be borne by the exhibitor;
 - 3、 Charging equipment: If the exhibitor' s equipment comes with its own power supply (lithium battery), the power supply must be stopped before the exhibition is closed and reported to the official contractor for record;
 - 4、 It is not allowed to decorate the booth by pasting stickers on the exhibition board, using glue, destructive tape, adhesive paper and paint, etc.;
 - 5、 Exhibitors are not allowed to add other additional configurations to the structure of the standard booth;
 - 6、 Standard booth configuration and fascia board are set up uniformly. Exhibitor should follow the rules of organizer if they prefer self design;
 - 7、 If an exhibitor orders two or more consecutive booths, unless the exhibitor specifically requests, the organizer will remove the panel between the booths.;
 - 8、 Exhibitors shall keep all rented items intact(standard and additional rental equipment, electrical boxes, industrial plugs, etc.). If they are damaged or lost, compensation shall be made according to the price;
 - 9、 According to Regulations on electrical equipment and devices in Shenzhen and Venue management regulations: in order to ensure the power safety of standard booths, all the power consumption of standard booths must be installed and supervised by the official contractor. It is strictly forbidden to pull or add lighting fixtures by engaging the unofficial contractor without permission. In case of violation of the regulations, power will not be supplied;
 - 10、 It is prohibited to connect plug board bring by exhibitor or lighting fixtures to the provided socket.
- Maximum allowed electricity power is 500W**, high capacity electric appliances (like kettle, stove or iron) are

forbidden. Exhibitor shall take the full liability for damage caused by outage or short circuit;

11、The Organizer reserves the right to place the distribution box and the overload protection distribution box in the appropriate position in the booth;

12、If the facilities in exhibition hall are damaged due to work at the booth, the exhibitor or related personnel shall be responsible for compensation at the price;

Note: For exhibitor who design the reconstruction scheme, especially who intend to nest their own structures inside the structure of standard booth, please check the size of booth and communicate with official construction contractor in advance. Otherwise, exhibitors should be responsible for any problem caused. Besides, exhibitors are required to submit the design scheme to official construction contractor. Details please refer to the relevant pages for raw space construction drawings auditing.

2	Structure Picture (Color)	Requirement: Indicate the main load-bearing structure (position of supporting points, load-bearing beam and connection technology), and need to be stamped	
3	Material and Size Picture (Color)	Requirements: Indicate the main material (B1 flame-retardant grade), and the dimensions of each part (beam span, wall thickness, material used, etc.), and need to be stamped	
4	Material flame retardant report	Requirements: flame-retardant carpet test report, fire-retardant coating test report, fire-retardant material factory inspection report, and need to be stamped	
5	Electrical system diagram	Requirements: Indicate the total power consumption, the rated current/voltage of the main switch, the specifications of the wires and the laying method, the calculation of the power consumption of the booth, and need to be stamped	
6	Location map of electricity, gas, water, and Internet	Form 8 Requirements: Mark the location requirements of all water, electricity, gas, and network cables on the booth (not required if there is no lease); Mark the booth number around the booth to distinguish the position, and need to be stamped	
Note: In addition to the above documents, the plan approval document and the original ID card of the person should also be reviewed.			

4) Raw Space Caveats (MUST READ)

1. The total height for single story structure is limited to 4.5m (including floor panel and suspensions), while the maximum height for double story is 6m (including floor panel and suspensions). For out-span of wood structure, it shall not exceed 6m; while steel/ steel-wood mixed structure (including steel cylinder, iron framing) shall not exceed 8m; and for steel grid, shall not exceed 12m.
2. Two emergency exits shall be shown, for booth that has more than 75% enclosed are, while the two shall not distanced less than 5m. For booth that sized not larger than 72m², there shall be no less than 2 opened exits (width not shorter than 2; height no shorter than 2m) ; while the two exits shall not apart longer than exceed 15m, and no blockage within 2m near the exits.
3. Ladder in the exhibition hall shall not exceed 2.5m and the maximum working height is limited with 2, no construction work is allowed standing at the top of any ladders. No one shall be working on the ladder when moving the ladder; and only one person is allowed on the ladder when work performed at height, and at least one shall be holding.
4. For work that must performed at height exceeding 2m, electric sandwich panel and scaffold shall be used, while board for construction scaffolds and safety fences shall be installed to meet the national safety requirements. Reminder: At least one worker shall be holding, and all wheels are locked to ensure it is stabilized.
5. During the construction of any special designed/ large scale booth, it is necessary to reserve openings to the ground manholes not to cover any of the exhibition hall facilities (electric box, gas supply, water supply). As to prevent any emergency and repairing problems with the exhibition hall facilities. If the background wall or the panel cannot avoid the manhole cover where the venue's outlet is located, you shall apply for facility shifting services at the service counter.
6. All exhibition materials shall use flame-retardant or fire-resistant materials, and the combustion performance level of the construction materials shall not be lower than B1 (flame-retardant type). It is strictly forbidden to use flammable fabrics such as knitwear, various stretch cloths, stretchers, etc (even the above materials have processed fire-resistant method). Bare wooden structures must be treated with fire-resistant paint; while all glasses must be tempered glasses. All wire must be protected by sheathed wire. The burning performance level of carpets laid on the ground shall not be lower than B1 level (flame-retardant type).
7. The glass used in the booth must use toughened glass and provide certain certification as a proof for on-site inspection and must be indicated with the national standard 3C mark. The thickness of glass with an area of more than 2m² shall not be less than 8 mm. Large areas of glass should be affixed with obvious

- signs to prevent breakage and injury. When using a glass platform, it is not allowed to set up a booth structure directly above the smooth glass surface.
8. It is strictly prohibited to make holes, nails and stick tape on the exhibition boards and exhibition hall buildings of the standard booth. If there is any violation, compensation will be made at the market price.
 9. The structural enclosed ceiling area of a special booth shall not exceed 50% of the area of the structure (calculated as an independent space). If there is confined space in the bottom structure of the second-story booth, a fire extinguisher must be equipped, and no locks should be installed.
 10. Special booths must be equipped with 5Kg ABC dry powder fire extinguishers, in accordance with the standard of no less than 2 fire extinguishers per 50 square meters of floor space.
 11. If the height of the background panel between adjacent booths is within the height limit, but the height is not uniformed, the construction structure is not allowed to be exposed, and clean white materials must be used to cover it.
 12. After the construction of the booth is completed, the remaining construction materials and waste must be moved out of the exhibition hall and properly disposed, and shall not be piled up in the fire evacuation passage/safety exit or the passage between the booth and the wall of the exhibition hall.
 13. All lightings and power must be turned off every day after the end of the exhibition. Once that has not been followed, all normal power supply of the booth will be cut off. Electricians, welders and other special types of workers must hold certificates when performing work.
 14. Facilities such as electric boxes, water sources and networks must be placed in the booth and not on public passages.
 15. Pyrotechnics and flames are strictly prohibited during the construction, deployment, official exhibition and dismantling in the exhibition hall.
 16. If the exhibitor's equipment comes with its own power supply (lithium battery), the power supply must be stopped powering before closure, and it must be reported to the home contractor for record.
 17. The area of the double-story booth shall not exceed 50% of the area of a first-story booth; the construction of the second-story booth must be submitted with the seal of the architectural design institute that with structural design qualification, the seal of the national registered structural engineer and the audit report, and the drawing (with signature) and the name of the stamp must be consistent.
 18. Lifting points management: The applied lift point is allowed to hang above the booth only (on the principle of not affecting the display of adjacent booths), and the height of the bottom end (lower edge) of the suspensions shall not be less than 6 meters. The lifting point structure cannot be connected to the ground structure in any form.
 19. Construction permit processing: The construction permit is uniformly processed by the Official Service

Counter. The specific process is detailed in the following <Application for construction permit procedure>.

20. Parking fees: Shenzhen International Convention and Exhibition Center has implemented parking fees to all private cars or trucks entering the ground parking lot (including the waiting area) or underground parking lot of the exhibition hall, they must pay the parking fee according to the standard parking fee of the exhibition center. The parking fee is subject to the price published on site in the exhibition hall.

2. Water, Electricity, Gas and Internet Service

1) Water Supply and Connection Service

No.	Item	Details	Special offer before 8/11/2024 (single price per period)	Original Price after 8/11/2024 (single price per period)	Price of Overtime
1	Water Supply and drainage	supply 16 millimeter; drainage 50 millimeter	2185	2405	115/per hour
2	Water Supply and drainage	supply 19 millimeter; drainage 50 millimeter	3335	3670	
3	Water Supply and drainage	supply 25 millimeter; drainage 50 millimeter	3680	4050	

Note:

- Pre-rental for the water supply and drainage should be submitted with floor plan of installation location and remarks the location of connection point. (Please indicate drainage position when handing in drawing plan of the booth)
- Except for domestic water, it is forbidden to directly discharge other grease sewage and waste water in the exhibition hall. The machine grease water needs to be equipped with its own circulating water device.
- Drainage rental shall apply before 8th November within the pre-rental period, application is not guaranteed successful after the time.
- The price listed is for the whole exhibition period, if any need using early, please contact official servicer provider for rental. For the outdoor connection fee, it is 1.5 times of the indoor price will be charged;
- If changes needed after the fixed water supply and drainage connection has been completed, apply to the on-site service desk in time and pay for it. It is strictly prohibited to operate without
- The reserved or installed drainage connection is not allowed to be replaced. If the location needs to be moved, or withdrawal a transfer fee (30% of the on-site price of the transfer facility) shall be charged.
- For safety reasons, the water supply will be stopped one hour before the end of the exhibition. Those who dismantle the exhibition in advance under special circumstances should apply for the removal of water supply and drainage pipes at the on-site service desk in advance. Any damage to the pipeline components shall be compensated; it is strictly forbidden to dump various liquids and garbage into the trenches of the exhibition hall.

No	Specification	Price	Deposit	Remarks
F1	220V/16A	400	1000	<p>1. Connection fee is included in the fee, but no industrial interface is included (you may have your own appliances or rental, no extra fee is needed)</p> <p>2. The deposit will be returned after exhibition through banking account.</p>
F2	380V/32A	500	2000	
F3	380V/63A	750	2000	

Notes:

- Pre-rental for the electricity should be submitted with floor plan of installation location and remarks the location of connection point.
- Deadline for electricity application is 8/11. Application is not guaranteed successful after 8th November.
- The distribution box of Shenzhen World Convention and Exhibition Center adopts leakage protection device, <Letter of Abandonment of Leakage Protection>, <product certificate> and <product circuit diagram> on Form 8 must be submitted when you choose not to use the device.
- The reserved or installed power connection is not allowed to be replaced. If the location needs to be moved, or any withdrawal, a transfer fee (50% of the on-site price of the facility) shall be charged. (Note: High power appliances cannot be added on-site)
- 30% of the rental price will be charged for industrial interface return and exchange.
- If you need to use electricity in advance, please apply to the contractor (the fee is shown in the table). Outdoor electricity connection is charged at 1.5 times the indoor price. In case of special reasons, on-site declaration is required. Exhibitors need to apply to the official service counter and the technical personnel will evaluate the construction conditions, and the application can only be processed after the construction conditions are met.

- g) During the installation period, electricity is only used for construction and is not allowed to be used for machinery adjustment. If you need to use electricity during the exhibition in advance, you must go to the service counter to apply.
- h) Please refer to the "Administrative Regulations" for relevant regulations on power connection; the setting value of the master switch protection of the power control box of the booth should be lower than or equal to 80% of the set value of the switch protection of the fixed power box connected to the exhibition hall
- i) During the construction of special booths or the placement of large-scale exhibits, it is necessary to reserve openings for the ground manhole covers of the outlets of the exhibition hall facilities (electric boxes) to prevent the exhibition hall's technical staff from handling problems in the exhibition hall facilities. If the background wall or the platform cannot avoid the manhole cover where the outlet is located, you need to apply for the facility relocation service at the service counter.

Note:

- Advanced rental for the internet service should be submitted with floor plan of installation location and remarks the location of connection point.
- No discount is applied for the internet application, and the application is not guaranteed successful after deadline 8th November.
- All internet application is applied for the whole exhibition period, if you need it before the exhibition held, please apply the service counter.
- Deadline:**
Optical fiber dedicated line, optical fiber broadband deadline: 3/11/2024
WIFI broad-band: 10/11/2024;
No late application
- The reserved or installed internet connection is not allowed replaced. If the location needs to be moved, or withdrawal, a transfer fee (30% of the on-site price of the transfer facility) shall be charged.

5) Lifting Point Rental Service

No	Category	Fee	Remarks
1	Lifting Point	2300/ period	After the plan is approved, the official constructor will notify the rental payment
2	Chain Block—15m/1T	345/ period	
3	Chain Block—25m/1T	520/ period	
4	Electrical Chain Block—15m/1T	1380/ period	
5	Electrical Chain Block—25m/1T	1725/ period	

About Lifting point service guideline

1) Construction requirement:

- i. Before 20/10/2024, the contractor shall provide with lifting point needs and related files, who will uniformly apply to the exhibition hall for lifting points and chain block;
- ii. After the application for the lifting point is approved, the main building contractor prepares the plan, and the contractor pays the corresponding lifting point fee and chain block fee;
- iii. The "Lifting Point Service Plan" shall be confirmed by the person in charge of the exhibition hall, the main building contractor and the contractor, and the contractor shall prepare the hanging items as needed;
- iv. Before the exhibition is set up, the main contractor assists the technical staff of the exhibition hall to put the steel wire rope and gourd hook zippers to the specified height according to the construction requirements (the hanging work below the gourd hook is the responsibility of the contractor), and the contractor puts the items that need to be hung to the hook.
- v. Before the exhibition is set up, the contractor will fix the construction and raise it to the specified height after confirmation. The home contractor will notify the exhibition hall technicians to put the chain into the chain bag and hang it;
- vi. After the hanging work is completed, the three parties (the exhibition hall, the main contractor' s responsible person and the constructor' s responsible person) must confirm the actual number and quality of the hanging points and sign;
- vii. Before the exhibition is set up, the contractor must go to the exhibition hall in advance to complete the lifting point construction work.

Note: The specific dates for the above work other than the date of report are determined by SW Pavilion, and the later notice of the home arena shall prevail according to the official service provider.

2) Requirements for lifting point removal

- i. The main contractor cooperates with the contractor to put the components to the specified height according to the progress of the dismantling;
- ii. After the contractor removes the components, the home contractor will recycle the sling, wire rope, hoist and other materials.

3) Lifting point requirements

- i. The contractor must inform the main contractor in advance before raising/lowering the truss

rack;

- ii. Only the SW exhibition hall technical staff, the head of the home contractor, and the constructor are present before lifting;

Note: The booth raising/lowering *truss frame* must be present by the SW Pavilion, the main contractor, and the contractor

3. Related Expenses

1) Management Fee, License Fee, and Deposit

No.	Category	Price	Remark
1	Management Fee for Raw Space	20/m ²	Must Paid Item for raw space exhibitor
2	Working Pass for constructor	20	Necessary for entering in hall for raw space construction. One per person.
3	Building Permit for Raw Space	50	Necessary for entering in hall for raw space construction. One per booth.
4	Booth Deposit	10000	Less than 100 m ² (Include 100 m ²)
		20000	101-300 m ² (Include 300 m ²)
		30000	More than 301 m ²

Notes:

1. Booth deposit includes but not limited to construction safety, cleaning, industrial interface (not included if bring your own) and facilities damage penalty. The fees must be paid to official service provider by raw space constructors before the construction.

2. Constructors shall clean their wastes and garbage during move-in and move-out time, if not, there will be a deduction of deposit, please see the deduction standards for more details.

3. The above deposit is recommended to be paid by the Special design Construction Contractor. Any violations of the construction work (such as overtime work, damage to the exhibition hall facilities, leftover special construction garbage, etc.) penalties will be deducted from deposit;

4. Reminder: The deposit is recommended to be paid by offline remittance before the exhibition and refunded after the exhibition.

2) Overtime Charge

Overtime Charge			
No	Time Period	¥ /Unit (area)	Remarks
1	17:00-22:00	23/m ²	Minimum charge unit is 72m ² , each overtime charge is calculated based on whole time period;
2	22:00-24:00	10/hr/m ²	Minimum charge unit is 72m ² , overtime charge is calculated based on hour within this time period;

- 1、 Minimum area charge is 72m², area not exceeding 72m² shall be calculated as 72m²;
- 2、 Temporary electricity for construction is included, except water and gas supply. For any need, please contact the official service counter.
- 3、 Exhibitor shall work within the designated working time period throughout the whole construction and dismantle period, if overtime working is needed, exhibitor shall apply before 14:00 on the same day at the service counter. The overtime procedures can only be carried out after reviewing and agreeing to pay the corresponding overtime pay; 30% handling fee will be charged for overtime applications; overtime applications will be closed after 16:30 on the day of overtime.
- 4、 Overtime must be calculated from the closing day of the overtime;
- 5、 The contractor is not allowed to work overtime after 24:00. In special circumstances, if it is required after 24:00, the official contractor shall apply to the venue and execute it after obtaining approval.

Part VI Appendix

Table 1

Application Form 1 for Special Booth Construction

Name of Exhibition:							
Booth Number:		Name of Exhibitor:					
Total Area:		Booth Size:	Length:		Width:		Height:
Construct Company:					Security Principal:		
Position:		Email Address:		Mobile Phone:			

We apply for special booths. To ensure safe construction and smooth development, we promise to the organizing committee and the exhibition hall:

- 1.The two parties have signed a construction contract and the construction unit has legal construction qualifications. Therefore, is the only designated contractor for the booth.
- 2.Area confirmation: the construction of the booth shall be in strict accordance with the area determined by the organizer, the vertical projection of the booth construction (including the door head, floating window, decoration, etc.) shall not exceed the marking position, shall not block the fire passage (door) of the exhibition hall in any form, and shall not press the yellow line of the exhibition hall.
- 3.Construction materials: In strict accordance with fire protection requirements, it is forbidden to use polyurethane materials such as bubble words and KT plates, and it is forbidden to use elastic cloth, velvet, gauze, etc. (Fire-retardant materials must provide relevant material testing certificates.)
- 4.The glass used to build booths must be tempered glass, and the glass used to make doors, windows, and fans that are larger than 2 square meters must be tempered glass., and the thickness shall not be less than 10 mm. It is also required to provide relevant material inspection reports and affix the official seal of the construction unit. Tempered glass installation requires the use of card slots
- 5.Fixing the glass must use glass nails, and a written installation and fixing plan must be provided. Safe use of electricity: the use of electricity wire material must be the national standard wire. It is strictly prohibited the use of twisted pair and flower line. Prohibit the use of high-power heating lamps such as halogen lamps. The connection process requires all joints to be connected with connectors, and the electricity load shall be within 80% of the application amount. Installation of electrical equipment and circuit must comply with fire safety requirements. Electricians must be qualified with "special operation certificate".
- 6.Construction safety management: All constructors must wear safety helmets correctly (must tighten the chin straps). , Professional tools must be equipped for climbing operation. When working on ladders over 2m, there must be someone underneath for protection. The use of wooden ladders is prohibited.
- 7.Dirt difficult to remove (such as coating, paint, elastomeric foam, etc.) on the floor of the exhibition hall or other facilities and equipment will be handled in accordance with relevant regulations.
- 8.Structural safety: The span of the wooden structure of the booth is limited to within 6 meters, and the single span of the steel structure and the mixed structure of steel and wood is limited to within 8 meters. The span of formed steel grid can be widened properly, but the maximum span shall not exceed 12 meters. All beam connection processes must meet the structural requirements. Both ends are required to be embedded in the wall or built on the walls on both sides, and the "broken beam" structure is not allowed.
- 9.All carpets must be flame-retardant carpets. Material inspection reports are required. Test with fire will be operated on site.

The above contents have been read by our company, and we fully understand that it will be strictly enforced. If there is any violation, we accept the penalties imposed by organizer and exhibition hall service providers in accordance with relevant management regulations.	
Exhibitor: (Official seal) Legal representative or safety principal (signature) On-site safety principal: Contact number: Date:	Booth contractor: (Official seal) Legal representative or safety principal (signature) On-site safety principal: Contact number: Date:

Video Play Management and Volume Control Commitment Letter

Booth number:

As an exhibitor of the DMP 2024 Greater Bay Area Industry Fair, we clearly know that the exhibition area is a public area and should consciously maintain the order of the exhibition in this area, create a good visiting environment for the visitors, and avoid being too loud. Therefore, our company will strictly abide by the video playback management and volume control requirements set by the organizer, and promise not to install any sound reinforcement equipment such as speakers in the booth; the video equipment comes with sound playback and does not turn on the sound reinforcement mode (such as subwoofer mode). The volume is controlled below 60 decibels; and during the exhibition, a designated person is responsible for the volume control of video playback in the booth; the video equipment will face towards the inside of the booth. At the same time, the company will cooperate with the organizer and monitor other exhibitors. If there is any violation of relevant regulations, we will proactively lodge a complaint with the organizer.

If we violate the video playback management and volume control regulations of the exhibition, our company accepts the relevant penalties of the organizer and take the responsibility the consequences.

Water/Electricity/Compressed Air/Network/ Location Map

Exhibitors who have facilities reservation (electric box, air compressor, water supply and drainage, telephone line, Internet line, etc.) must fill in this form completely, and submit to the online platform of official contractor before the deadline. We will arrange the location as close as possible according to the facilities of the exhibition hall.

If the exhibitor /constructor fails to return this form on time, we will place the pre-rented facilities of your company in or around your booth. The actual location is subject to the pipe trench of the exhibition hall. The arrangement may not be completely consistent with the location map provided by your company. If the location of the site is changed, the relocation fee of the relocated facilities shall be charged (50% of the on-site price of the relocated facilities shall be charged), and no relocation shall be accepted from the last move-in day of the exhibition. Please place the pre-rented facilities of your company, mark the rental facilities of the booth in the drawing.
